To DOE 1-800-767-0739

Possible site recommendation for Yucca Mountain:

BEST AVAILABLE COPY

I am a californian who has some experience in the back country of Nevada -- particularly its unparallelled wilderness sites & areas -- I oppose the SITE RECOMMENDATION FOR YUCCA MOUNTAIN FOR A nuclear repository for SEVERAL REASONS:

1) Yucca Mountain's geology & proximity to earthquake faultlines. This region has faultlines which could reactivate & produce potentially large quakes which would disturb & a nuclear respository, letting waste escape into Nevada's environment.

2) the failure of DOE to stop leaking / groundwater contamination at other Nevada sites -- particularly in Beatty, Nevada... Once Yucca Mountain's water is contaminated, will DOE pay for clean-up??

Sincerely,
Fred Andres
