Comments: I support the nuclear storage facility at Yucca Mtn. This country NEEDS nuclear power and nuclear waste MUST be stored somewhere. While no place may be PERFECT, Yucca mountain seems to be the best place in the country. It is certainly better than keeping the waste on site as it is now. I really wonder why so many people are up at arms over the spent fuel rods, while no one seems to be at all concerned about the manufacture and transportation of the fresh fuel rods, which logically must be far more "hot" than the used rods. I trust Yucca mtn to be safe, and will be a source of money/employment for Nevada.
