as i am unable to attend the meeting tonight i would like to make the following
comments. I am totally against the storage & transportation of nuclear waste in the
state of nevada. Where are the states rights? Havent we done our share of hosting
nuclear assistance what with testing of the bombs etc. The states that generated the
waste & received benefit from it should totally shoulder the responsibility for the
storage. I vehemently oppose the goverments & nuclear industries efforts to shove it
down our throats..Please make sure these comments are aired in the meeting tonight.
The U.S. Government should be ashamed of themselves. Cut the politics & keep this
trash out of Nevada...
