Subject: THE ONLY VIABLE SOLUTION TO DOE YUCCA PROBLEM

Part of Records Package / Supplement / Correction

Dear Sir,

As a citizen of Nevada I have always supported the use of Yucca Flats as the only usable place for the storage of containerized nuclear waste. I also know that nuclear power is vital to the economic well-being of the U.S.

Your problem in this state is that Senator Reid has totally sold out to any group that pretends to be environmentally motivated. This includes any of the land-grabbing groups that are taking control of the country, such as the Land Conservancy in San Francisco, where he and his staff transferred \$15,000,000 worth of BLM land so they could sell it and use the money to further their land-grabbing goals.

YOUR ONLY SOLUTION:

Contact your people in every state that would utilize Yucca storage, and have them quietly contact the Governors of each of those states. Those states must write to your Nevada delegation and send a message similar to the following.

"As Governor of the State of _____ we wish to advise you of the following facts: The economic welfare of the U.S. is totally dependent on nuclear power and we must utilize the safest means possible for the depleted waste material. The only place that meets all of the requirements is Nevada in the Yucca area. Our State will suffer irreparable economic harm unless meaningful progress in utilizing the area is finally planned, in the near future.

The people of the State of _____ agree that we desperately need this storage area of safely containerized material in the Nevada Yucca area. If the State of Nevada refuses to help meet the needs of this Country, we will boycott the state from any visitation.

Governor.

You must take immediate action to get this States comments ASAP.
