Department of Energy

Dear Sirs: Aside from regular objections shared by all Nevadans, and in light of the recent national disasters, I submit additional objections for the storage of high-level radioactive waste at Yucca Mountain as follows:

CENTRALIZATION OF STORAGE will give these terrorist killers one easy immovable target. This target cannot be defended, and if sabotaged or attacked, will be the result of the DOE assisting and abetting terrorism ending with the mass murder of American citizens.

LAND TRANSPORT OF WASTE will facilitate many "easy targets" which will again assist the enemies of the United States effecting large populations throughout our country at any given time. One doesn't have to be a 'Rocket Scientist' to realize that there are many ways to sabotage these 'easy targets'; a sniper on a hilltop armed with high powered weapon; dynamiting a bridge while the vehicle is crossing (will also effect the water source below); a proven and successful favorite, the hiring a private plane and slamming into the vehicle; stalling a private vehicle loaded with explosives in a tunnel under water will also do the job nicely; or by simply having a terrorist apply for a job in one of these facilities (please recheck present employee background).

SOLUTION TO MINIMIZE THREAT: By keeping the waste at their present locations is more insurance to thwart sabotage as long as security at each location is kept at it's highest level. The National Guard could assist with security at these locations and additional monies for the enhancement of high-tech security equipment may be garnered from the government in light of our national disaster.

Do not be naive in thinking that Mohammed Atta (pilot that slammed into the World Trade Center) was visiting Las Vegas on June 30th, July 1st and August 13th to visit our Mosques. He was pursuing the destiny he chose for us; the destruction of either Yucca Mountain, Hoover Dam, Nellis AFB, the 'Strip', southern California or the combination of any of them. The DOE can help prevent this!

If the DOE permits waste movement from ANY present location, the DOE will have also earned themselves dual billing with Osama bin Laden on an FBI WANTED poster.

I implore you on behalf of every citizen in our great country (which includes you and the members of your families); do not join league by supporting the enemies of our country by thinking of moving one ounce of high-active radio waste, especially at this unsafe moment in the history of our planet.

Being disabled, I am unable to attend your next scheduled meeting and hereby request you publically read this correspondence to those in attendance at that time.

GOD BLESS AND HELP AMERICA BECAUSE THE DEPARTMENT OF ENERGY ISN'T.
Marie Castoire
