Subject: Yucca Mountain Protest Letter

Part of Records Package / Supplement / Correction

Dear Ms. Hanlon:

I am writing to express my deepest concern over the Yucca Mountain Project in light of the recent terrorist attacks. It makes no sense to have a concentration of nuclear waste processed or stored anywhere now. Nor is it in the National Security interest to transport waste away from where is it made. Each of these shipments would be a vulnerable target for terrorists. This is simply unnecessary. Leave the waste where it is made, or in smaller regional facilities. This is a no brainer. Thanks for listening.

Sincerely,
Julia E. Hammett
