Comments: I am aware that this project would require shipping of radioactive waste extremely close to my home and my neighborhood. Kirkwood, Oakland (Tree City USA where I live!), Webster Groves and Crestwood (where I work!) MO. would all be affected if there were an accident. We just had a train derailment in Webster Groves, MO. Please if you must ship this waste, and I am aware it must go somewhere, ship it through a less populated spot! These towns have some homes that are well over 100 years old and would be uninhabitable after a spill. Also we have a lot of green space and abundant wildlife even though we are a suburban population but we are fairly close to the tracks and DO NOT want to have to worry about a spill. The derailment was scary enough and we were very lucky no one was at the tracks when the train derailed because that area is usually heavily traveled. My only question is, "Isn't there a plan that DOESN'T include shipping the waste through heavily populated area?"

Thanks you,

Elizabeth Willnow
