10-3-01

Dear Mr. Gordon:

I am greatly concerned about the proposal to use Yucca Mtn as a nuclear storage facility. The porous nature of the volcanic rock and the proximity of geologic faults are two main concerns. As a resident of St. Louis I am also alarmed by the risk of accident or terrorist attack involved in nuclear waste shipments. Do not plan to ship this waste through my home or any other!

Sincerely,

John Casnoff
