6 MS. KOENIGSDORF: The name is Janet

7 Koenigsdorf, K-O-E-N-I-G-S-D-O-R-F.

8 I also feel the states that benefited and

9 created this should keep it and the water table is a

10 big concern. We are downhill from Yucca Mountain and

11 they say that it's safe, but Five Mile Island was, too,

12 when we started it. It's not safe any more.

13 As far as transporting it on the roads, if

14 there were an accident, we don't have a hospital. We

15 don't have proper medical facilities here to treat

16 anybody. And if they force it upon us, then the

17 government should reduce our Federal taxes if they're

18 going to put that in our backyard because there is a

19 threat regardless of what they say. It is not a safe

20 thing. That's all I have to say.

21 MS. SWEENEY: Thank you, ma'am.
