Subject: Yucca Mountain storage site

Part of Records Package / Supplement / Correction

I live in Webster Groves, Missouri, approximately 150 yards away from a railway that was the site of a large train derailment this past summer. Tons of coal was dumped into the streets of my town. I have been advised that nuclear waste shipments bound for the Yucca Mountain waste storage site will traverse those same railways for up to the next 30 years. These shipments pose a serious safety risk to my neighbors and me, and I for one am opposed to them.
