Subject: Yucca Mountain Project

Part of Records Package / Supplement / Correction

Dear Sirs or Madams,

As a 10 year Las Vegas resident I want to show my SUPPORT for the Yucca Mountain project. I think it is unfortunate that most people against the project are, as a whole, not very well educated on the subject except by the press. Very little of the facts are as interesting or controversial to the public as the extremely unlikely event something catastrophic would occur. I feel a scenario like that would be much more likely with waste stored on site facilities rather than at YM. I am not here to argue for or against nuclear power, I happen to support the newer reactor designs. However, the fact remains the waste is already there and is not going to go away. We should step up to the plate and make Yucca Mountain happen. Site storage to me is akin to sweeping something under the doormat. This is a much more permanent solution and should be implemented as soon as possible but without compromise to public safety.

Thank you,
Shawn C. Manning
