Subject: Fw: Yucca Rail EIS - UP rail traffic

QA:N/A

Cynthia,
 Below is the information that we have to date on UP traffic for Caliente (and also Mina - a bonus.). I think the information gives you a sense of the traffic. If you need more detail, as Phil indicates, we will have to make further contact with UP.

Please address future requests on this matter to Phil and I. That will expedite answers. Phil is our point-of-contact for all UP questions.

Richard

Based on our UPRR meeting in Omaha November 3, 2005, the number of trains through Caliente on a average for a 24 hour period is 28. I do not have any more details on what this adds up to in the way of tons of freight or average number of cars/train.

Phil,
 The PxP review was only with respect to Caliente. Cynthia is looking for the UP traffic at Caliente. Do we have any info on that?

The UPRR told us last June that the Mina Branch shipments totaled 1,419 rail cars in 2005. It should be noted that the Mina Branch includes shipments on a 16 mile spur to Fallon. From the 1,419 rail cars, 98 rail cars were shipped to Hawthorne Army Depot. These trains vary in length from 3-40 car train consists.

Phil,

Do we have a handle on the request below? Seems like UP has provided approximate daily traffic.

Richard,

During the Page-by-Page for the transportation section it was suggested that the EIS should discuss impacts to the existing UP rail traffic and that BSC could provide us available traffic numbers on this line. Would you be able to provide this or who should I be forwarding this request to? Thanks.
