COMMENTS: Attached

Please note: Your comment(s) must be received by the Department of Energy by June 1, 2004 to be considered. Comments received after the close of the comment period will be considered to the extent practicable.

If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so the address and postage-paid notice are visible, then secure with tape.

Please feel free to attach additional pages (if mailing, more postage may be needed).

To the Department of Energy
In regards to the proposed construction of the Caliente Rail System to the proposed
Yucca Mountain

In the present condition of the world today, I want to voice my opinion to the proposed Caliente Rail System. In the spirit of national security, I would hope that giving an opportunity for a terrorist target to an opposing group to the United States of America is not an option at this time.

If you must propose a transportation system to Yucca Mountain, I would hope that are provisions for security against unauthorized entry to key points on the railroad lines from the plants to Yucca Mountain.

I humbly oppose your rail proposal due to national security concerns of moving an unstable item across the country to an unprotected disposal site.
