Comment Text :

1 --> [The saga continues, Nevada will be the national dumping ground for the nations toxic garbage. Carried here by an antiquated railroad, through towns and cities who have no say in the danger they are exposed to. Having been involved in nuke explosions (Bikini-Crossroads and French explosions at Muroroa Atoll (Reconnaissance) I can assure you that although everyone extolls the safety factors you can rest assured that if anything can go wrong it will go wrong! The stupidity of placing everyone in danger for twenty years is unbelievable. A recent event involving a runaway chlorine railroad car right thru the heart of Las Vegas proves my point. Thousands were exposed to potential catastrophe. If the states that approved Nuclear Power succeeded in placing their nuclear refuse they should be required to keep their detria in their own back yard. The government is totally remiss in declaring that Nevada should be the dumping grounds for others. A good neighbor keeps his filth in his own yard not dumping it on others.]
