Comments: I am NOT in favor of having a nuclear waste repository in my back yard. Why should Nevada have to accept the nuclear garbage from all the other states? I say store the waste in the state that produced the waste.

Furthermore, transporting nuclear waste is dangerous to the health of the people living in the area. ONE human mistake could cause many deaths and property values to drop to zero! We should find ways to recycle this waste in breeder reactors, or find scientific ways to render this waste less harmful. In the meantime, I say the states that produced the garbage should store the garbage!]

Sincerely,
Bill Wilson
