Subject: proposed Yucca nuclear waste repository

LSN: Relevant - Not Privileged  
User Filed as: Excl/AdminMgmt-14-4/QA/N/A

I [ Why has the Yucca Mountain invasion plan not been discarded? Where is the logic in gathering up the most dangerous waste produced in the U.S., hauling it slowly from small sites all around the country, and dumping it into one enormous smouldering heap in a place that is geologically completely unsuitable (as if any spot could be suitable for such a science-fiction environmental burden)--a place that contains THIRTEEN FAULT LINES! Who will say "Oops! We're sorry. We didn't think..."? The planet does not forgive. Please fire Dr. Strangelove now and reconsider your options. ]

Sincerely

Suzanne M. Miller
